Installation of Built-in Oven

- In order to ensure that the built-in appliance functions properly, the cabinet containing it must be appropriate. The figures above give the dimensions of the cut-out for installation under the counter and in a wall cabinet unit.
- The above dimensions apply to all Cornell Built-in Oven models.

Installation of Chimney Hood

- Minimum hood distance above cooktop must not be less than 650mm.
- A maximum of 750mm above the cooktop is highly recommended for best capture of cooking impurities.
- Distance over 750mm above the cooktop is at the installer's and user's discretion - providing that ceiling height and flue length permit.
